Understanding the Significance of a 1:25 000 Scale Map in Freeride Navigation

What Does the 1:25 000 Scale Represent?

A map scaled at 1:25 000 means that one centimeter on the map corresponds to 250 meters in the real world. This scale strikes a balance between detail and coverage, offering enough granularity to identify terrain features, ski routes, and hazards without overwhelming the user with excessive minutiae.

In the context of freeriding, especially in complex terrains like La Grave and La Meije, this scale allows riders to:

- Accurately assess slope angles and features.
